

**NEW UZBEKISTAN - A NEW WORLDVIEW**

**Annotation:** This scientific work analyzes innovations in almost all areas of the country, the development process, as well as reforms to build a free and prosperous society, measures to form a new worldview, based on a wealth of evidence and the principles of modernity.

**Keywords:** Foreign currency, Innovative development, Infrastructure, International expert, Foreign investment, Enterprises, Intellectual, New strategy.

Works in recent years. Building a free and prosperous society in the new Uzbekistan is not something that one person can do. The contributors to the development of the new Uzbekistan are you, me, my neighbors, relatives, in general, who considered themselves a real Uzbek child, the owner of this land. From the very beginning, the new worldview begins with the smallest link - the family and the neighborhood.

At the present time, the art of public speaking plays an important role in the development of a new worldview among the youth of independent Uzbekistan. Because every student who is brought up in the spirit of a new worldview, every employee who strives for a new worldview, must know the secrets of the correct and literate program, beautiful reading, speech culture and public speaking, as well as today and tomorrow. meets the requirements. he must do it in every way.

Today, the well-being of everyday life finds its practical expression through the ongoing popular production.

Promoting the large-scale work carried out in our country, informing the population about the social, socio-economic situation in our country and the

world, expanding the content and significance of the ongoing large-scale work "New Uzbekistan-new Under the motto "Worldview" cultural and educational propaganda tools are being created.

Today, the quality of its independent development Uzbekistan has entered a new stage. In this regard, it has been cooperating effectively with many countries and international organizations in various fields.

The development of mutually beneficial relations with people and states is facing significant challenges.

It can be said that today the head of our state is striving for the well-being of national Uzbekistan, but also Central Asia, living his dream of producing a movement, a region that is widely integrated with the world, and is manifested as a similar labor.

In a short period of time, the people of Uzbekistan have made great strides, which laid the foundation for the decision to take a worthy place in the world community.

At the initiative of the leadership of our developing country, the process of modernization and the policy of relations with neighboring countries are recognized by the world community.

In the conversation with the editor-in-chief of the newspaper "Yangi Uzbekistan", the President spoke in detail about the ongoing democratic changes, organizational and business policies.

It is also important that the New Uzbekistan is a free and prosperous country, the ultimate goal of which is to develop on the basis of friendly projects with the world community, adhering to universally recognized norms and principles for democracy, human rights and freedoms. and a state that is committed to creating a prosperous life.

These vital situations are being implemented in the interests of our people, first of all, thinking about the democratic prospects of today and tomorrow of our young generation.

"Human rights and freedoms", "Rule of law", "Openness and transparency", "Freedom of speech", "Freedom of religion and belief", "Public control", "Inviolability of private property", "Freedom of economic activity" "And so on.

When we talk about the term "new Uzbekistan", first of all, a new economic relationship, a new economic outlook. For the past five years, we have not been able to reach the end of this year.

E-card money, which has long bothered people, can be withdrawn from cash through ATMs, the national exchange rate is different, and in banks it is different, buying currencies, buying housing and amenities from the market years of Uzbekistan, buying property and a number of issues related to procurement have gone down in history.

The strong political will of the leadership of our country gives entrepreneurs the freedom to develop their business and new developments, and farmers and cluster farms are becoming the real owners of their crops.

This testifies to the fact that the President is constantly mobilizing all his knowledge and experience, strength and day for the prosperity of the Motherland, the well-being of our people, and this qualitative process is intensifying, rising to a new level and moving forward.

As noted by the President, in the development of industrial knowledge and experience, it is possible to gain experience, continuous study, research, aspiration to innovation, introduction of high technology, effective production.

The leadership of our country is developing economic initiatives aimed at diversifying the economy, modernizing agriculture and developing economic ties.

It is noteworthy that in order to fully implement production, Uzbekistan is taking measures to develop a sustainable creative economy based on innovative development and accelerating economic growth.

Its main idea is to see material exports, but also to ensure the creation of new quality jobs, the use of goods.

Creative economics, economics, "Start-ups", ie new business, involves active participation in personal production through the support of original ideas.

Start-ups are widely introduced in our country. They are especially popular with young people. The largest initiatives in a wide range of areas are e-commerce, education, communication and navigation technologies, transport and road infrastructure, medicine and biotechnology.

Development and liberalization of private entrepreneurship More than 20 normative and legal acts have been adopted, amendments and additions have been made to a number of existing laws, the necessary conditions have been created to support business entities. According to international experts, the implementation of economic policy in Uzbekistan is changing.

This, first of all, has the economic activity of the population and helps to improve a favorable business environment. At the same time, the main focus is on the production of high-tech and investment-intensive production and the active involvement of potential partners in the economy.

There are no free economic zones to facilitate the production of additional products designed to stimulate foreign investment.

In a short period of time, 11 free economic zones have been established in several regions of the country. This also extends from power generation and resource reloading.

Today, the development of entrepreneurship in Uzbekistan has become a driving force of economic development. It is known that the development of any society is determined by human capital, ie intellectual property, health, education, labor productivity, high quality of life.

In today's modern world, this factor is a key factor in a creative economy. Experts also note that the creative class in Uzbekistan has become more active and will become a mainstay of the economy in the future.

These include innovative technology parks specializing in scientific work, experiments, development of innovative products.

The Law of the Republic of Uzbekistan "On State Youth Policy" provides for the free use of state youth policy for the social protection of young people and the development of legal, intellectual, creative and other personnel. is important as one of the lamli.

In addition, the establishment of specialized schools to ensure in-depth education of young people and the leadership of the President's schools in each region also serve to nurture talented and harmoniously developed people.
